## DATA SOURCES

This report is a compilation and re-format of important social and economic data describing the population, land, and commerce of the Coastal Plains Economic Development Region. It presents current and past conditions as well as forecasts of future characteristics and trends.

The statistical data and graphic documents were compiled from published and unpublished sources -- private and governmental. Apparent discrepancies in summary data are due to rounding and allocating.

The tables and charts contain numerical footnotes to their bibliographical sources, which are listed after table 16.

This publication was prepared by members of the Office of Regional Development Planning staff: Joel Frisch, Information Systems Officer, and Wayne J. Morse, Research Assistant.
